

SALESFORCE ADMIN / DEVELOPER TRAINING ROADMAP

NEW BATCH STARTING SOON

WHO WE ARE

BUILT BY REAL SALESFORCE PROFESSIONALS

Cloud101 Academy is a training initiative led by experienced Salesforce Leads and Specialists. We teach with clarity – you'll understand not just how things work, but *why*.

Our mission: practical training that prepares you for **real jobs**, real interviews, and real projects.

No rote learning. No confusing theory. Every session is rooted in actual Salesforce industry experience – so you walk out ready to contribute on day one.

WHO IS THIS PROGRAM FOR?

Students & Graduates

Business Analyst

Working Professional

Not IT Background

QA Engineers

Career Switchers

No prior Salesforce or IT experience needed — our beginner-friendly approach starts from zero and takes you to job-ready.

OUR ADVANTAGE

WHY CHOOSE CLOUD101?

We don't just teach salesforce - we build developers who are ready for the workplace from day one.

Live Coding Every Session

Every class is hands-on. You write code, solve real scenarios, and build projects — not sit through slide decks.

Enterprise-Grade Projects

Build complete apps mirroring real business use cases. Your portfolio will look like someone with 2 years of experience.

Personalized Code Reviews

Get direct feedback from Salesforce Technical Leads on your code quality, best practices, and improvement areas.

Industry-Current Curriculum

Covers Admin, Apex, LWC, Integrations, and Deployment — everything a 2026 Salesforce job description asks for.

Interview-Ready Preparation

Mock interviews, targeted Q&A drills, and resume coaching so you walk into interviews with confidence.

Support Until You're Placed

We stay with you through job search — LinkedIn optimization, GitHub portfolio, job application guidance, and referrals.

Truly Beginner-Friendly

No prior IT background required. Our structured approach builds your foundation before tackling advanced concepts.

Professional Community Access

Join a growing network of Salesforce learners and practitioners for peer support, networking, and career opportunities.

Full Stack Developer Program

DETAILED CURRICULUM

8 structured modules from Salesforce fundamentals to advanced integrations and real-time projects.

1 SALESFORCE FUNDAMENTALS

- Cloud computing concepts
- Org overview & navigation

UI Debugging

REST API Tool
Integration Testing

Build Real Applications

PROJECTS IN PORTFOLIO

Don't just learn theory – build production-quality apps that showcase your skills to potential employers.

01

Recruitment Management System

End-to-end app managing the full hiring lifecycle – job postings, candidate tracking, interview scheduling, and offer management.

02

Service Ticket System

Customer support portal with ticket creation, assignment, escalation workflows, and SLA tracking dashboards.

03

Sales Order Processing

Complete order management system with product catalog, pricing rules, approval flows, and revenue reporting.

04

Hotel Booking Application

Full booking platform with room availability, reservation management, check-in/check-out workflows, and billing integration.

05

Customer Onboarding App

Automated onboarding experience with dynamic forms, workflow automation, welcome communications, and progress tracking.

WHAT YOU'LL BUILD IN EACH PROJECT

Data Model

Apex Classes & Triggers

LWC UI Components

Reports

Dashboards

API Integration

Deployment

Career Support

WE SUPPORT YOU UNTIL YOU'RE HIRED

Placement assistance isn't an afterthought – it's built into every step of the program.

ATS-optimised resume preparation

LinkedIn profile optimisation

Mock technical interview sessions

Salesforce Developer interview Q&A

GitHub portfolio support

Job application strategy guidance

Portfolio project creation assistance

Industry references & networking
